FULL PHYSICAL KEYPAD FOR DASHING SPEED AND ACCURACY

UPGRADED INTERNALS, BACKWARD COMPATIBLE ACCESSORIES

PM67 is a rugged Android mobile computer and armed with a full physical keypad, inspired by its predecessor PM67. The highly functional form factor proved its power and versatility around many applications, including transport & logistics and warehouse management. For PM67, we upgraded the internals and improved performance yet left the outside intact. Nearly all accessories of PM67 are compatible with PM67, which keeps the cost per device on a low.

### THE POWER OF THE LATEST ANDROID OS FOR ENTERPRISE APPLICATIONS

PM67 runs on the latest Android 11 operating system and is GMS (Google Mobile Services) certified to support all official APIs. Point Mobile's unique Enterprise Mobility Kit (EmKit) is pre-installed and free of charge, offering easy deployment, device management functions, and more.

PHYSICAL BACKLIT KEYS TOWARDS FIELD-WORK-FORCES

In many industrial applications, users prefer physical keys instead of a touch based virtual keypad on screen — especially with gloves or outside with bad weather. Each key on PM67 is wide and big enough for firm, fast and accurate data input. LED backlit keypad makes working easy in any dimly lit area. Above the keypad is the 4.3in touch screen showing the Android interface.

FULLY-RUGGED AND VERSATILE FOR HARSH ENVIRONMENTS

Designed to withstand harsh conditions, PM67 is water/dust resistant (IP67) and survives multiple drops from 1.5m to steel over the entire operating temperature range. The display is covered by Corning Gorilla Glass for optimal protection against impact and scratches.
